

## COMMUNITY DAY

PUNE 2022 ---

## Do more with Redis Enterprise Cloud

{ Don't struggle with Performance, Scale, and Cost }

SUYOG KALE, Solution Architect Manager @ Redis | 2022

## **Agenda**

Cloud adoption and growth

Need of real-time data platform

Challenges with other caching solutions

Why Redis Enterprise Cloud?

### Cloud Provides Enormous Value

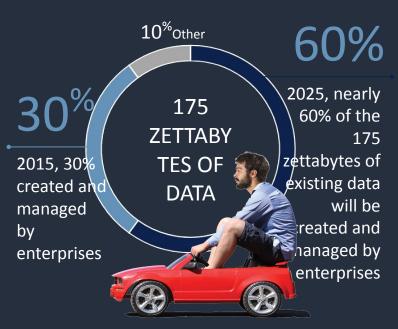

- Agility: build new digital apps quicker to gain new revenue streams
- Consolidate data silos to gain new visibility and streamline business
- Simplify operations and reduce TCO
- Scale your business up and down instantaneously with elasticity.

### ... And Data Is The Lifeblood of Modern Applications

91%

of organizations moving to the cloud specify mass

data fragmentation as the cause of not fully realizing cloud benefits

### Cloud is fueling the DBMS Market Growth

- The cloud is forcing the DBMS Market to shift from on-prem to the cloud
- ⅓ of all \$52+B in DBMS revenue is all about Cloud and growing
- Public cloud spending will grow from \$229 billion in 2019 to nearly \$500 billion in 2023 - IDC
- By 2023, cloud data management will account for 50% of DBMS revenue in a nearly \$100 billion market

Modern applications and infrastructure need a real-time data platform

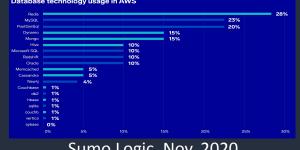

## Redis is popular with developers due to speed

### **MOST LAUNCHED**

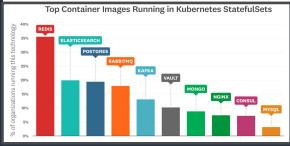

Launches/day: Docker Hub April, 2021

### **MOST USED**

### Sumo Logic, Nov. 2020

#### Datadog, Nov. 2020

### **MOST LOVED**

Stack Overflow, 2017, 2018, 2019, 2020,2021

# Yes, we provide way more value than any other version of Redis

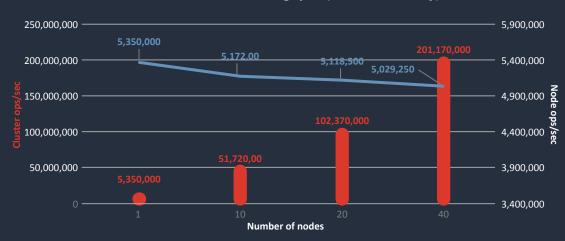

Customer challenge	Redis Enterprise solution	Redis OSS
Hybrid & multicloud	Fully-managed in AWS, Azure, and GCP	Lock-in with cloud vendor
Struggle delivering real-time at all times	Real-time at all times with 99.999% Uptime	Significant downtime with 99.9% Uptime
Difficulty supporting business at global scale	Active-Active Geo Distribution	Limited Active-Passive
Keeping Redis costs under control	Cost effective at scale with Redis on Flash, multitenancy	Expensive at scale
Lack of true Redis Expertise	Managed and supported by the creators of Redis	Support provided by generalists from cloud
Inability to meet additional real-time use-cases	Real-time data platform	Cache only

### Redis Enterprise enables instant performance at petabyte scale

- True shared-nothing architecture to enable linear scaling
- Fully utilizes multi-core architecture
- Automated scaling and resharding without downtime

#### Cluster and node throughput (@ <1ms latency)

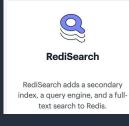

Redis Enterprise extends linear scalability with **200M ops/sec** @ <1ms latency on only 40 AWS instances

### Multiple data models with unprecedented performance

Key-value and data structures (7x - 50x)

- Dedicated engine for each data model
- Model engines can be selectively loaded, according to use case
- All model engines access the same data, eliminating the need for transferring data between them

Search (4x - 100x)

JSON (10x)

documents at the speed of

Bloom (17x)

Streams (500x)

# Redis Enterprise unifies data across clouds and regions with Active-Active

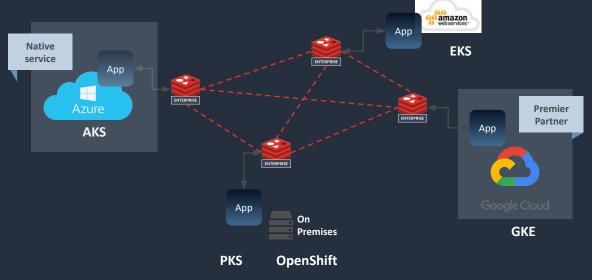

- Consistent datasets for any environment (on-premises, hybrid, or multi-cloud)
- Easier to develop cloud-native and geo-distributed apps
- Enables high performance and highly responsive apps

# Redis Enterprise enables hybrid and multi-cloud deployments

- Flexible deployment options
- Built for any flavor of the cloud
- Fully managed support for Microsoft Azure, Google Cloud, and AWS
- Avoid vendor lock-in and cloud sticker shock
- Unify your data-layer across the deployment environment

### Redis Enterprise reduces TCO for larger datasets

(1TB replicated dataset (2TB total) @ 100K ops/sec)

- Compute real-time analytics with minimal resources
- 3M ops/sec @ < 1ms latency on a single server

Redis Enterprise Cloud with Redis on Flash allows me to handle peaks in traffic that grow 2000% without any need to scale my database infrastructure."

-Redis Enterprise customer

### Multi-tenant architecture lowers TCO

## Redis Enterprise helps you realize the promise of the cloud

True high availability with upto 99.999%

Sub-millisecond latency at infinite scale

Lower TCO

Multiple data models

Global data
distribution with
Active-Active
across regions,
clouds, and hybrid
environments

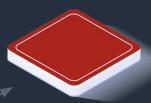

### Do More With Redis Enterprise Cloud

### **Applications for**

#### Data Economy

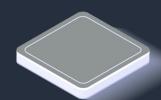

- Features serving for real-time data
- Programmable data operations across data models
- Fast transaction, in-transit data processing

### Data Models for Application

#### Modernization

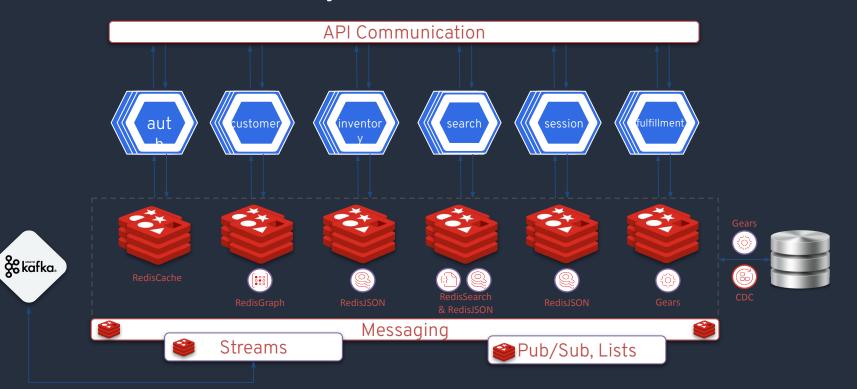

- JSON, Timeseries, Streams, and BloomFilter
- Extensive indexing and search capabilities
- Unprecedented performance with single unified interface

- Sub-millisecond latency under any load
- Five-nines (99.999%) uptime with active-active
- Effective TCO with multi-tenancy and tiered memory access

## Redis & Microservices / Event Driven Architectures

## Suyog Kale

Solution Architect Manager

## Thank you!

See you at the AWS Community Day Pune 2023
